

*Town of Derry*  
*"Derry, New Hampshire's Place to Be"*

## UTILITY LICENSED CONTRACTOR APPLICATION

The Town of Derry requires that all contractors who propose to perform work on municipal water or sewer utilities in the Town of Derry must be Prequalified by the Department of Public Works. There will be nine (9) classes of pre-qualification.

They are:

- I. Water Main (  $\geq 4$ " ) Installation**
- II. Water Service (  $\leq 2$ " ) Installation**
- III. Water Main Tapping  $\geq 4$ "**
- IV. Water Main Tapping  $\leq 2$ "**
- V. Sewer Main Construction include SMH Installations and Corings**
- VI. Sewer Service Installations (6" – 8")**
- VII. Sewer Main Taps and Coring**
- VIII. Excavation and Trench only**
- IX. Pump Station Construction/ Installation (Service Grinder and Booster Pumps)**

Each contractor who wishes to be prequalified must fill out the enclosed application including the classes for which they desire prequalification.. A contractor must demonstrate complete competence and aptitude in construction practices through references from other **Municipal officials** or **Engineers**. A minimum of **3** references for each class of certification must be submitted.

A General Contractor who utilizes subcontractors for either excavations, tapping or pipe laying may be Prequalified in the respective classes by submitting the subcontractor's name and references.

Be aware that the prequalifications shall specify a **"responsible person"** who shall be on site for all work to be performed by the contractor. A contractor may designate more than one **"responsible person"** on his application, however each "responsible person" must have valid references.

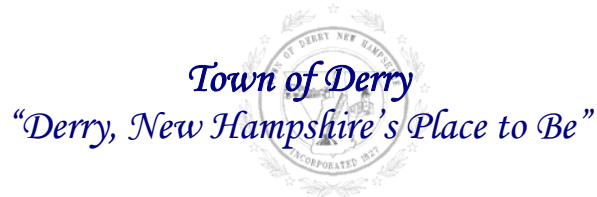

All contractors who are Prequalified must have a current original Street Opening maintenance bond in the amount of \$5,000.00 or other acceptable surety and appropriate insurance certificates. The Town reserves the rights to increase bonding requirements for multiple or large scale utility projects up to 100% of the job cost.

Contractors must sign a statement certifying that they have obtained, read and understand all Town of Derry specifications for Utility construction.

Prequalifications are valid for as long as the responsible persons are employed by the Contractor and the bond is in place and the Contractor remains in good standing with the Town (all asbuilts are submitted etc.)

If there are any questions on the prequalifications process, requirements or questions relative to Derry's construction specifications please contact Mark L'Heureux, Engineering Coordinator.

Please allow up to **10** working days to obtain prequalifications.
