Date _____

NOTE: "No Occupancy Permit shall be issued nor occupancy take place in any building or structure whose source of water is to be provided from a private well until the following conditions have been met."

All wells yielding 2 gallons or less per minute, regardless of depth, shall be pump tested to determine sustained yield. Pump tests shall be conducted over a 48-hour period. All results from pump testing must be certified by the tester and so evidenced on the well data sheet provided by the building department.
