

# *TOWN OF DERRY, NH*

## *EMERGENCY MANAGEMENT*

### *NEWS RELEASE*

**To: Media Outlets and Citizens of Derry, New Hampshire**

**Date: October 30, 2017 5:00pm**

**Subject: Wind Storm- Press Release #1**

Heavy rain and strong damaging winds have closed roads and knocked out power to many. Eversource reports 32% of Derry residents are still affected by power outages. Early this morning, 57% of our community was without power. Utility and public works crews have worked throughout the day to clear debris and wires from roadways. As of 2:30 p.m. there are 26 roads that are fully closed and 13 that are partially closed. Emergency responders have been extremely busy handling 215 calls for service. Because of the widespread damage throughout the entire region, Eversource reports it could be several days until power can be restored.

The fire department is urging citizens to stay clear of downed wires as they may still be energized. When operating generators make sure they are not being run indoors and are at least 10 feet from the structure. Generators running inside a structure can cause carbon monoxide poisoning and result in death. Citizens with questions can call the Derry Emergency Management Hotline at 603-845-5522.

The Zoo Fitness Club and Planet Fitness are allowing residents to shower at their facilities during the power outages.
