June 2023  
Monthly Update

It seemed like it rained every day in June. A miserably wet start to summer has kept people inside and may have thwarted the movement of mosquitoes early in the month. Dreary weather won't hold mosquitoes back indefinitely. Everyone is eager for sunny weather and the mosquitoes are eager to see us.

All that rain filled a variety of mosquito habitats including manmade containers, catch basins and woodland depressions. Dragon crews have checked and treated catch basins and wetlands. To reduce the number of mosquitoes that can spread disease even further, homeowners should frequently dump standing water from containers in their yards.

Limited trapping of adult mosquitos began in June. The State Lab in Concord tested mosquitoes one month earlier this year but only for Jamestown Canyon Virus (JCV). The illness is considered serious, but rare. Many people infected with JCV do not have symptoms. People with compromised immune systems may exhibit symptoms in 3-10 days. Initial symptoms can include fever, fatigue, and headache.

In June Dragon Crews have:

- Checked wetlands for mosquito larvae
- Treated larvae with Bti as needed
- Responded to house calls
- Monitored catch basins for larval mosquito activity
- Treated catch basins with Natular to control disease carrying mosquitoes
- Trapped, processed and identified adult mosquitoes
- Sent select species to the State Lab for Jamestown Canyon Virus testing

As always, the best way to prevent all mosquito borne disease is to avoid mosquito bites. Check out the attached information sheet on ways to prevent mosquito bites.

# Prevent Mosquito Bites

## Dump Out Standing Water

Many mosquito problems in your neighborhood are likely to come from water-filled containers that residents can help to eliminate. All mosquitoes require water to reproduce. Be sure to dump any standing water around your house.

- Even the smallest of containers that collect water can breed hundreds of mosquitoes. They don't need much water to lay their eggs. (barrels, buckets, overturned garbage cans, lids, etc.)
- Dispose of tires responsibly. Check with tire dealers in your area. Tires can breed thousands of mosquitoes.
- Drill holes in the bottom of recycling containers.
- Clean pet water dishes regularly.
- Change the water in birdbaths at least twice a week.
- Kayaks, canoes and boats should be turned over.
- Prevent water from collecting on pool covers.
- Remove abandoned swimming pools and hot tubs.
- Empty water collecting in tarps around the yard or on woodpiles.

## Protect Yourself

Wear light colored, loose fitting clothing. Some mosquito species are attracted to dark clothing and some can bite through tight-fitting clothes.

- Use air conditioning or screens on windows and doors to keep mosquitoes outside.
- Turn off your porch light. It may help keep mosquitoes out of your house.
- Wear long sleeves and pants.
- Using coconut scented soap may reduce your appeal to mosquitoes.
- Avoid being outside at dusk and dawn when possible.
- Use Repellent: Choose a mosquito repellent that has been registered by the Environmental Protection Agency. Registered products have been reviewed, approved, and pose minimal risk for human safety when used according to label directions. Three repellents that are approved and recommended are:
  - DEET (N,N-diethyl-m-toluamide)
  - Picaridin (KBR 3023)
  - Oil of lemon eucalyptus (p-methane 3, 8-diol, or PMD)

## Protect Your Animals

- Vaccinate your horses, donkeys, llamas and alpacas for West Nile Virus and EEE.
- Consult your veterinarian about heartworm prevention for dogs and cats.

## Activity Report

### June 2023

Date	Activity
6-05	Set out light trap on Overledge Dr
6-05	Survey right of 13 Al St - scrub swamp
6-05	Survey behind 66 Overledge Dr - swamp
6-05	Survey between 56 & 58 Overledge Dr - retention pond
6-05	Survey beginning of Dubeau Dr - woodland depressions
6-05	Survey behind & left of 17 Brier Ln - red maple swamp
6-05	Survey 8 Al St to Eleanor Ave - scrub swamp
6-05	Survey across, right and behind 8 Twinbrook Dr - stream, woodland pools and swamp
6-05	Survey North side of Warner Hill Rd - start of State ATV trail - woodland pools & depressions
6-05	Survey left of 1 Ballard Rd - woodland pools & root holes
6-05	Survey right of 30 Morningside Dr - woodland pools
6-05	Survey behind 127 & 129 Windham Rd - pools
6-05	Survey behind & between 7 & 9 Tyler Rd - swamp & pools
6-05	Survey between 6 & 8 Belle Brook Ln - woodland pools
6-05	Survey front of 4 Belle Brook Ln - woodland depression
6-05	Survey across from 4 Belle Brook Ln - small swamp
6-05	Survey left, right and behind 2 Belle Brook Ln - swamp and woodland pools
6-05	Survey front of 2 & 4 Olesen Rd - pools
6-05	Survey behind 28 Morningside Dr - swamp
6-05	Survey left of 40 Overledge Dr - ditch & pool
6-05	Survey behind 127-129 Windham Rd and to left of trail - swamp and woodland depressions
6-05	Larvicide behind 127-129 Windham Rd and to left of trail - swamp and woodland depressions
6-06	Picked up light trap on Overledge Dr
6-07	Adult mosquitoes identified and processed
6-08	Adult mosquitoes sent to State Lab for disease testing
6-09	Survey catch basins on Blake Farm Rd
6-09	Survey catch basins on Drake Ln
6-09	Survey catch basins on Harvest Dr
6-09	Survey catch basins on Hubbard Ct
6-09	Survey catch basins on Jewell Ln
6-09	Survey catch basins on Kristin Dr
6-09	Survey catch basins on Ruben Rd
6-09	Survey catch basins on Sagamore Dr
6-09	Survey catch basins on Spollett Dr
6-09	Survey catch basins on Walnut Hill Rd
6-09	Larvicide 258 catch basins
