

**1.) In regards to the cut and cap of the water and sewer lines...can we cut and cap these lines or do we need to utility contractor that is approved by the Town of Derry, NH?**

- *The sewer and water are both private so you are not obligated to hire a utility contractor.*

**2.) Do will need to install temporary fencing on the project?**

- *You will be responsible or security on the site while it is under demolition. Given the scope of the project, I suspect that following the removal of the asbestos siding, the remainder of the work will be completed very quickly. I do not envision security fencing being necessary.*
