

### **Question Set #1**

Is there a construction budget for the project? If so, what is the budget amount?

The Town Council has provided a \$500k appropriation for improvements to Hood Park.

### **Question Set #2**

Does the DPW have a scaled building plan of the bathhouse that will be made available to the group? –

Unfortunately, there are no scaled plans available for the bathhouse.

Does the town have plans of all the underground utilities in the park or will the survey have to hire a utility locating company as part of the survey?

The park has a sewer interceptor line running through the park and a water service that is known and can be marked out. There is an underground conduit for electrical service to the bathhouse that has an estimated location, but the specific location would need to be noted in the field.
